Street, Intersection Closures on Downtown Bridge St. in October

Granbury, Texas – On Monday, October 9, and continuing for two to three weeks, there will be street and intersection closures on Bridge St. between Houston St. and Crockett St.

Bridge St., from Houston St. to Crockett St., will be closed for pavement repairs. This section of Bridge St. will be closed beginning on October 9 and will remain closed until the entire area reopens in approximately two to three weeks.

During this street closure, turning radius adjustments will also be addressed, starting with the Crockett St./Bridge St. intersection. This intersection will be closed in addition to the Bridge St. closure starting Tuesday, October 10. After the adjustments are completed at the Crockett St./Bridge St. intersection, that intersection will be reopened. The Houston St./Bridge St. intersection will then be closed, and the turning radius adjustments will be applied to this intersection.

An ongoing list of punch items for the Granbury Town Square Streetscape, Pavement, Drainage & Pavement Marking Improvements project will also be addressed during the month of October.

Drivers and pedestrians on the square should follow instructions of posted safety and detour signage, and not cross construction barricades.

For more information, visit www.granbury.org and click on “Downtown Streetscape Project” under “Top Pages” on the homepage. On this page, you will find news releases, project updates, progress photos, and answers to frequently asked questions. Any additional questions regarding the project should be directed to the City’s public information officer, Bethany Kyle, at (817)573-6764 or bkyle@granbury.org.
